

SAEID SHOJA

REACT.JS FRONTEND DEVELOPER

Tehran-Iran

PROFILE

Experienced Javascript Developer with motivation and passion for programming and learning more. Skilled in ReactJS, typescript, and Cascading Style Sheets (CSS).

always try that every line of code that I write be for the sole benefit of the person who uses that product and makes their life better!!! I hope that the work that I do not only enriches the lives of others but allows me to build on my own experiences.

I'm eager to learn new things that the company that hires me needs to have.

I like to work with new technologies, learn them and keep my information up to date. Of course I'm a fast learner and I can learn anything our company need.
